THE SMARTEST INTERNET ACCESS AVAILABLE
Co-Location.com customers connect directly to the Level 3 backbone. Co-Location.com leverages Level 3’s superior network to deliver the power, flexibility, and manageability needed for a company to rapidly scale its Internet bandwidth. The network is equipped to respond to demand for data-intensive content and our clients take advantage of Level 3’s world-class service and support.

The statistics and track record of this high-performance, high-bandwidth service excel in every way. Co-Location.com customers benefit from Tier 1 network performance and ease of connection while paying market-leading price points with flexible contract terms.

FIRST INTERNATIONAL 10 GBPS BACKBONE
Level 3 has substantially completed an international fiber optic communications network connecting Europe and the United States. Level 3 operates the first international 10 Gbps (OC-192), seamless, redundant IP backbone. With more than 522 traffic aggregation access points, the Level 3 Network is widely accessible via all Level 3 Gateways, Level 3 EPOP locations, Level 3 metro transport, and third-party access partners.

UNPARALLELED NETWORK PERFORMANCE AND INTERCONNECTION
Level 3’s fully fault-tolerant network offers redundancy at the metro, national, and international levels, and their own state-of-the-art hardware and facilities keep traffic moving rapidly and safely. Co-Location.com backs this up with the Service Level statements made in our standard terms and conditions guaranteeing 100 percent network availability, low maximum latencies in all regions, and less than 1 percent packet loss.

The quality of an IP Network cannot be measured solely by the size of its backbone and amount of peering connections. The amount of customer connectivity is critical when choosing an IP Network. Level 3 has a significant customer base that includes over 750 Gbps of internet traffic internationally, representing 40% of leading Web sites and nearly every major national carrier.

A continuously upgradeable network with no congestion guarantees that the performance of the Level 3 network is exceptional. High capacity, scalable peering interconnections ensure uncongested connectivity between the world’s largest Internet backbone networks.

COMPETITIVE PRICING
To make your life easier, Co-Location.com customers have many billing options to choose from. Upon signing up, you decide how to be billed based on your traffic patterns. Whichever billing option you choose, Co-Location.com’s competitive rates have never been more aggressive.

FLEXIBLE CONTRACT TERMS
Co-Location.com offers the most flexible contracts in the ISP industry. We understand the complexities of the technology industry. Consequently, we built our contracts to meet your needs:

- No term commitment
- No revenue commitment
- No Mbps/Gbps commitment

A PROVIDER FOCUSED ON ENABLING — NOT COMPETING
Co-Location.com focuses on what it does best: wholesaling low-cost, high performance IP services to broadband access providers, carriers, service providers and broadband content providers. In other words, we don’t compete with our customers — we enable them to grow. As Co-Locaiton.com’s aggregate traffic on the Level 3 backbone grows, we pass along economies of scale to our customers, and we all win.
The Ability to Reach Anywhere — Internationally
Co-Location.com leverages Level 3’s broadband network and high capacity peering interconnects to deliver high performance On-Net and Off-Net Internet connectivity.
